

The background features a dark blue gradient with a network of glowing blue nodes and lines. On the right side, there is a close-up of a hand with a green wireframe overlay. The wireframe consists of interconnected lines forming various polygons, with some solid green diamond shapes interspersed. The overall aesthetic is high-tech and digital.

Why choose Microcad Software?

Our success is our clients' success. We are constantly evolving and innovating to offer the most capable solutions and contribute to **the growth of your business.**

MICROCAD
SOFTWARE

Empowering Designers since 1987

Technical Support

We are part of your team and are available to address inquiries, resolve installation and operational questions, and help you achieve proper performance of your projects..

Tailored Training

We provide you with continuous training, either online or in-person, whichever best suits your needs, so that you can make the most of your programs.

Regular Updates

We ensure that you always have access to the latest market trends and demands. We want you to stay updated without hassle.

Support Center

This is a space designed for our clients where you can find everything you need, such as videos, manuals, frequently asked questions, project inspiration, and much more.

Our Team

The human value of Microcad Software is what sets us apart. We are a technology company that values personal interactions and strives for a close and attentive customer experience.

Our team consists of two generations of professionals in technology development. The ability to transmit knowledge, values, and passion for this industry makes us unique.

Microcad Software is composed of a multidisciplinary team, highly skilled, with a strong presence of expert and specialized profiles. We have a dynamic, young, enthusiastic, and disruptive character that achieves the perfect combination.

Empowering Designers since 1987

Our essence lies in our values and our dedicated team

Experts

We have over 35 years of experience dedicated to developing interior design applications compatible with AutoCAD®, providing designers with the most advanced technology.

Human

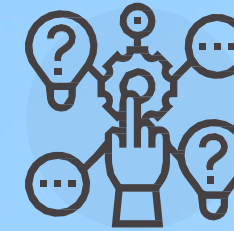

We are dedicated to serving you. As a people-focused technology company, our mission is centered around assisting and supporting others.

Solution-oriented

Because we believe in effort, sacrifice, and perseverance to always find a solution to our customers' problems, which drives us to improve every day.

Flexible

Our products stand out for their ability to communicate with other software programs, the quality of presentations, and their adaptability to different devices and platforms.

Specialists

The experience of many years working on the development of technological tools for interior design has made us specialists. We are experts, and we know what we are doing.

Reliable

Our products meet all the guarantees and expectations of our customers. We develop tested and perfected tools over the years.

These are our tech tools, designed to make your work easier and improve your day-to-day tasks:

Powerful and flexible software with personalized service, available in-person or over the phone:

autokitchen

autoclosets

autodecco

Simple and affordable software with service provided through the web and via email:

Quick**3D**Plan

Quick**3D**Closet

autokitchen

One software for all interiors

Increase your sales by creating realistic projects **quickly and easily.**

Autokitchen is the kitchen design software for the most demanding professionals.

- 1** Autokitchen features customizable **catalogs** from the best furniture manufacturers, countertops, appliances, and accessories to complete your projects.
- 2** Autokitchen utilizes **AutoCAD® DWG** files, making it compatible with the most widely used design program worldwide.
- 3** Create 3D designs with **photorealistic renders** using Autokitchen. Generate **virtual walkthroughs** to impress your audience with stunning presentations.
- 4** Thanks to its **cloud service**, you can share your designs anywhere and on any device, providing you with maximum flexibility.
- 5** Autokitchen offers both **perpetual license and subscription** options, allowing you to choose the option that best suits your needs.

autoclosets

The closet design software

The fastest, simplest, and most powerful solution for **point of sale and custom closet and manufacturers.**

With Autoclosets, you can design all types of closets, generate plans, 3D images, and estimates just a few minutes.

It features **extensive catalogs** with multiple models of accessories, doors, and various finishes.

Autoclosets quickly and easily creates photorealistic **3D images with floor plans and elevations** according to the desired measurements.

You can generate a **parts list** of your design to streamline the manufacturing process.

autodecco

The interior design program

The solution for designing **industrial** and **commercial spaces**.

Autodecco helps you carry out design projects for commercial spaces such as restaurants, bars, stores, and other spaces that require a **fast tool** for realistic project visualization and the generation of **detailed technical information** for projects.

1

It features **extensive catalogs** of furniture, commercial equipment, and storage solutions.

2

It incorporates tools for **customizing catalogs** based on AutoCAD® blocks.

3

Autodecco generates designs in 3D quickly and easily, providing photorealistic images, panoramas, virtual walkthroughs, **component lists**, and **detailed plans**.

Your **fastest, simplest, and most affordable design** program

Quick3DPlan is a program with which you can efficiently and intuitively carry out interior design projects such as kitchens, bathrooms, closets, and living spaces.

1

It provides you with easy, fast, and precise placement of **furniture, accessories, and design elements.**

2

It allows you to print plans and **generate lists of references** and descriptions of the furniture.

3

It creates **3D images** with materials, lighting, and shadows to present your projects to clients.

Quick3DCloset

Easy design, great power

Design closets in 2D and 3D.
Quickly, easily, and affordable.

Quick3DCloset® allows you to design and price a closet in just a few minutes and insert it into the room with the rest of the furniture.

- 1** It allows you to design **custom walk-in closets** and wardrobes with options for doors, including sliding or hinged doors, and offers a wide range of materials and finishes to choose from.
- 2** It offers an extensive **catalog of accessories and tools to dress the interior of the closets** quickly and accurately. Additionally, it has a furniture catalog for bedrooms.
- 3** It generates the **budget for the closet by components, provides lists**, 3D views, and plans with fully dimensioned front and floor views of the closet

Tailored programs

Our **tailored programs** represent significant **time and resource savings** for companies as they provide a tool with all the features and functionalities **tailored to their specific needs**.

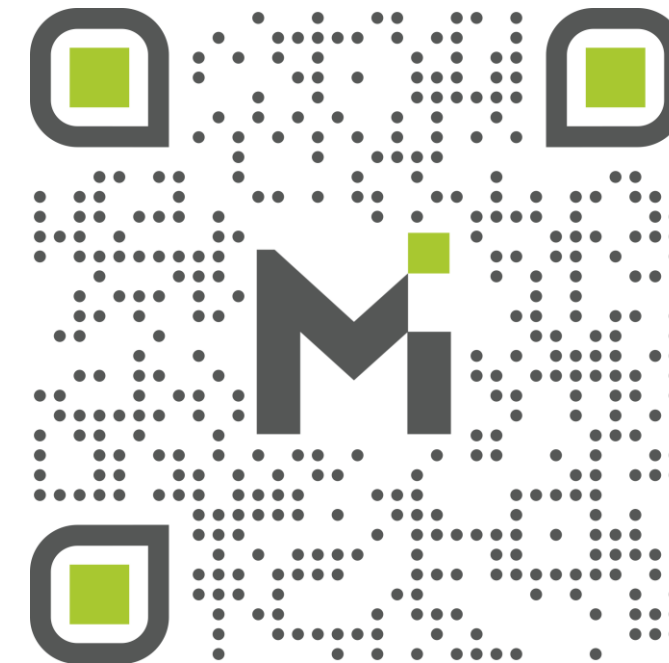

1 Tailored programs utilize the technology from our specialized programs, saving development time and ensuring reliability.

2 Some of the custom programs we have developed, include implementing shelving systems, designing pharmacy laboratories, gyms, ship command bridges, clothing store franchises, and more.
